

SIRANJEEVI

Full Stack Developer (MERN) | Node.js | React.js | MongoDB | Azure
9042707001 | siranjeevi26@outlook.com | linkedin.com/in/siranjeevi-v-737409421

PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience building scalable web applications, RESTful APIs, and real-time systems. Proficient in Node.js, Express.js, React.js, Next.js, MongoDB, PostgreSQL, and Microsoft Azure. Hands-on experience with WebSocket, Scrum workflows, third-party integrations (Shopify, webhooks), and cloud deployment on Azure. Passionate about clean code.

CORE SKILLS

Back-End: Node.js, Express.js, Hapi.js, REST API Development, JWT Authentication

Front-End: React.js, Next.js, Redux, HTML5, CSS3, JavaScript (ES6+), TypeScript

Databases: PostgreSQL, MySQL, MongoDB, MS SQL Server | **Languages:** JavaScript, TypeScript, Python, C#

Cloud & DevOps: Microsoft Azure, AWS, Render, Vercel

Tools & Concepts: Git, GitHub, Postman, API Integration, Unit Testing, Database Design, Performance Optimization, Debugging

AI-Assisted Tools: Cursor, Co-pilot, Trae, OpenCode, Claude ai

PROFESSIONAL EXPERIENCE

Software Developer | Lithi InfoTech, Madurai Jun 2025 – Jul 2026

- Reworked legacy backend architecture using Node.js and Hapi.js with AI-assisted refactoring (Cursor, Copilot), improving system scalability and reducing average API response time.
- Implemented secure RESTful APIs with JWT authentication and optimized MS SQL Server queries using AI-assisted debugging, cutting database query execution time.
- Developed backend modules (User, Dealer, and Admin Panels) for a mobile application supporting 1,000+ active users.
- Designed and developed the backend architecture for a matrimony application using Node.js and Hapi.js, integrating Razorpay for online payments and Firebase Cloud Messaging (FCM) for push notifications.
- Designed and implemented webhook integrations with three external platforms — Shopify, MDI, and TPH — to automate order processing and data synchronization, eliminating manual workflows.
- Built multilingual localization modules (Language Master and Localization tables) supporting 5+ languages.
- Applied prompt engineering and AI-assisted development tools (Cursor, GitHub Copilot, Claude) for code generation, code review, unit-test writing, and documentation, accelerating backend delivery.

Back-End Developer | FlexiDigit Technologies, Bengaluru (WFH) May 2024 – May 2025

- Developed 20+ RESTful APIs for Hotel Management, HRMS, and Warehouse Management System (WMS) modules — including master data, inbound/outbound, and admin dashboards — serving 3 production applications.
- Built Warehouse Management System (WMS) with dynamic PDF generation and a C# utility to parse and print label files, reducing manual printing time using a file watcher system.
- Developed Azure Functions in .NET to convert Microsoft Project (MPP) files to JSON and transfer data between Azure Blob Storage containers, automating a previously manual workflow.
- Designed and deployed core modules (login, master data, reporting, and search) for 2 e-commerce websites with secure authentication and data visualization dashboards.
- Managed backend deployment on Microsoft Azure, ensuring production scalability and security.

Full Stack Developer (MERN) — Intern | Why Global Services, Chennai Oct 2023 – Apr 2024

- Built responsive web application features using React.js and Node.js under senior developer guidance, contributing to 3 sprint deliverables in a Scrum environment while learning scalable architecture and RESTful API design.

Trainee | DRDO, Bengaluru Dec 2022 – Feb 2023

- Gained exposure to enterprise system workflows and technical documentation in a defense research environment.

EDUCATION

M.Sc. Computer Science, May 2023 | B.Sc. Computer Science, May 2020 — Thiagarajar College, Madurai

CERTIFICATIONS

Python — Udemy | Java — SSI, Madurai | Full Stack Development — WHYTAP, Chennai
